DO YOU KNOW?
Strokes occur in toddlers, children and teens.
Stoke is an emergency at any age.

SPOT A STROKE
F.A.S.T.

Face Drooping  Arm Weakness  Speech Difficulty  Time to Call 911

If your child has one or more of these signs, don’t delay — call 911 or the emergency system.

Additional Warning Signs in Children:
• Sudden severe headache, especially with vomiting and sleepiness
• Sudden weakness or numbness on one side of the body (face, arm and/or leg)
• Sudden confusion, difficulty speaking or understanding others
• Sudden trouble seeing in one or both eyes
• Sudden difficulty walking, dizziness, loss of balance or coordination
• New onset of seizures, usually on one side of the body

If it looks or feels like a stroke, it may be one.

FACTS TO KNOW

Signs of stroke are often missed in children and teens because of LACK OF AWARENESS.

About half of children who had a stroke had a PREVIOUSLY IDENTIFIED RISK FACTOR.

The clot-busting drug tPA and clot retrieval devices AREN’T FDA APPROVED FOR USE IN CHILDREN.

Medical conditions associated with stroke include: Sickle Cell Disease, Moyamoya Disease, Arterial Dissection, Autoimmune Disorders, Congenital Heart Diseases and Blood Clotting Disorders.
