CRYPTOGENIC STROKE

I WILL Turn collaboration into better
diagnoses and fewer recurrences.

StrokeAssociation.org/CS

Medtronic

Medtronic supports the American Stroke
Association's Cryptogenic Stroke Initiative.

IN ABOUT 1 IN 4 ISCHEMIC STROKES, THE ROOT CAUSE IS STILL UNKNOWN AFTER TESTING.

That's why it's important to say "I will" to digging deeper for a clear diagnosis. Your commitment includes collaborating with neurologists, cardiologists, electrophysiologists and other team members to find the answers needed for targeted treatments that could help prevent recurrent strokes. We've got tools to help.
